Increase Efficiency...Reduce Overhead Costs! LifeLab Solutions redefines productivity

Why Choose LifeLab Solutions?

LifeLab Solutions, Inc. is a comprehensive resource for the human tissue banking industry. We provide database solutions and consulting services for both start-ups and established facilities.

LIFELAB DATABASE MANAGER: A MODULAR APPROACH

Administrative Module

is the core module for the laboratory management system. The Administrative module provides both the Administrative and Technical staff with secure and rapid access to donor and QA/QC data from a single interface.

AndroLab Module

was designed by Andrologists to address the needs of both the technical and supervisory staff of the busy Andrology laboratory. Validation checks, report generation, audit logs and remote access promote efficiency and data integrity. Automated generation of invoices for cryopreserved specimens and generation of Regulatory Reports is just one way The LifeLab Database Manager insures a rapid return on investment.

EmbryoLab Module

was designed by a team of Reproductive Embryologists, Embryologists and Nurses to assure rapid access to the data most important to each team member. Tracking of cycles from both the patient and practice level is easily and securely accessed locally and remotely through a HIPAA compliant solution.

With over 20 years of experience in the Clinical Laboratory and Tissue Banking fields, LifeLab Solutions software and diverse management team was developed in response to the increasing volume and complexity inherent to human gamete storage. Paramount to all types of tissue banking, tracking each specimen from receipt through processing, storage and distribution together with the monitoring requirements necessary to insure the quality of the distributed tissue was front and center in the development of our software solution, the **LifeLab Database Manager**.

How can LifeLab Solutions, Inc. help you?

The procedures and software developed for tissue banks by LifeLab Solutions is the result of clinical experience and expertise by the LifeLab Solutions, Inc. team. LifeLab consultants have decades of experience in diverse areas of tissue banking, from male and female gametes to blood and stem cell storage. We are continuing to add to our network when we identify experts in their respective tissue banking disciplines.

Performance-First Imperative

Maintaining data integrity and accessibility with increased stored specimen volume leads to challenges for the tissue bank. While database management solutions have become more robust, infrastructure failures occur and database management solutions must address the needs of clinical laboratories and tissue banks to maintain secure data and provide rapid reporting. LifeLab Solutions, Inc. mission is to provide solutions that will safeguard data integrity and help drive operational change that will contribute significantly to laboratory quality as well as the bottom-line. Organizations wishing to be more proactive in managing the efficiency by which they run their tissue banks have discovered the value of LifeLab Solutions, Inc.

Do you need instant access to your data on multiple platforms? LifeLab Database Manager Software works 'out of the box' on both PC's and Mac's. Our iPhone integration provides mobile access to the database with e-mail and direct dialing capabilities from within the application.

Are you missing deadlines or having trouble staying on top of all of your reporting? LifeLab Database Manager Software provides complete network infrastructure performance reporting and is the only product suite that provides proven solutions to insure an efficiently run laboratory and tissue bank.

What if you have multiple laboratory sites? LifeLab Database Manager can support multiple satellite facilities with secure data links and backup protocols. Our HIPPA compliant solution provides remote access to authorized personnel.

How long does it take to be 'up and running?' Installation takes less than a day, and the software provides actionable data within a few hours of installation. Support and upgrades are provided through secure links by LifeLab Solutions, Inc.

How long does it take to recoup my investment? With increased staff efficiency and preventing unnecessary investments in additional software, LifeLab Database Manager typically pays for itself within the first year. LifeLab customers are able to make more informed decisions about provisioning, optimization, and resource allocation, and can avoid mishaps that impact business results.

What if you have a problem? LifeLab Solutions, Inc. provides excellent customer service. Our support team is accessible by phone, e-mail and web link insuring that questions are addressed rapidly and effectively. LifeLab customer advocates ensure you are getting the most value from your LifeLab investment.

What else can we help with?

Market Analysis: Our consulting team can provide you with the metrics needed to identify the marketplace and target your niche.

Financial Analysis: Our financial consultants can develop a financial analysis based on your marketplace and your practice including a 'Stand alone' proforma, offering a best guess of the costs and revenue of a tissue bank and/or andrology laboratory as well as an 'Impact' proforma, providing an analysis of how an installation of a tissue bank and/or andrology laboratory would contribute to your overall practice bottom-line.

Practice Management: We can help in all phases of development from market and financial analysis to construction and regulatory compliance to insure that a state-of-the-art facility is ready to accept its first specimen in minimal time. Our team of consultants is available to help with the process of opening and maintaining a laboratory as well as assisting in the creation of all documents necessary to comply with regulations. We also can implement our LifeLab Database Management software specifically designed and tested to manage all aspects of the Laboratory and Tissue Bank.
